ABOUT US

Since 2003, we, EAE Automotive Equipment Company Limited, with manufacturing facility in Wujiang and over 300 employees, focusing on passenger and commercial vehicle service lifts, have been one of the forefront garage equipment exporters in China.

In recent years, we have taken great stride in market expansion both overseas and in China. With a complete portfolio of passenger vehicle lifts under 8000KG load capacity that are manufactured in-house at our Wujiang manufacturing facility, our products and solutions have been commissioned in over 90 countries. In addition, we have been exceptionally successful in domestic passenger vehicle lift market, winning numerous awards, projects, approvals, and certifications from a number of world-renowned car manufacturers.

However, because of our realizing that the market is ever changing and competition increasing, we never ignore our heavy focus in research and development, and product FMEA/longevity testing, product training, and demonstration of our products and solutions.

EVERET, a brand owned by EAE group, aims to provide a comprehensive garage equipment solutions. With the professional team in sourcing, supply chain management, quality control etc, EVERET is your ideal choice for one stop buying.

TIRE CHANGER

MAIN FEATURES

- Leverless head makes tire mounting and demounting easy and quick, prevents damage to tire and rim.
- The dual speed motor (380v) allows operator to change the turning speed easily.
- The pneumatic locking system of assist arm is easy to use.
- The control handle and foot pedal make the operation easier and faster.
- Powerful bead auxiliary arm makes the tire assemble/disassemble fast and efficient.
- Humanization design of the lever makes operating head align the rim accurately.
- Dual layers mainframe design reduce the resonance and noise effectively.
- \varnothing 200mm aluminum air cylinder.
- Optional: air blast device.

522-C

Lever Less
Dual Speed
Standard Assistant Arm

DETAIL DISPLAY

New type of leverless tool head

Mechanical pressing device convenient for falling down the vertical shaft

Optional manual control bead breaker makes easier to operate

Dual-speed motor for 380V make tire mount/demount more efficiently

One more pressing point and plastic disk with quick changeable device

TECHNICAL DATA

Models	Internal clamp	Max. wheel diameter	Max. wheel width	Power supply	Motor power	Air supply	Noise level

TIRE CHANGER

For Car And Motorcycle Tire EE-4601

MAIN FEATURES

- Car and motorcycle tire changer.
- Semi-automatic side swing arm.
- With self-centering function.
- Adjustable mount/demount head.
- \varnothing 80 air cylinder, chromium-coated piston rod reduce the friction effectively.
- CE certificated.

MAIN FEATURES

- Tire changer for low profile tire.
- Semi-automatic side swing arm.
- Durable mainframe for long service life.
- With self-centering function.
- Adjustable mount/demount head.
- \varnothing 80 air cylinder, chromium-coated piston rod reduces the friction effectively.
- Bead breaker for car and motorcycle.
- Mounting head angle is made to be adjustable to suit for rim with different size.
- CE certificated.
- Optional round column serves as air blast reservoir.

EE-4900A

Round Column

MAIN FEATURES

- Especially used for run-flat tires (RSC) and flat tires.
- Automatic tilt back tire changer.
- Pedal assembly may draw from front cover.
- Tilting back column and pneumatic locking system.
- With self-centering function.
- Adjustable mount/demount head.
- \varnothing 80 air cylinder, chromium-coated piston rod reduces the friction effectively.
- Aluminum-alloy valve bodies with durable corrosion resistant stainless steel valve rod.
- CE certificated.

EE-4430

Automatic Tilt Back Column

TIRE CHANGER

EE-4112d Basic Model

MAIN FEATURES

- Semi-automatic side swing arm.
- Durable mainframe for long service life.
- With self-centering function.
- Adjustable mount/demount head.
- \varnothing 80 air cylinder, chromium-coated piston rod reduces the friction effectively.
- CE certificated.

TIRE CHANGER

EE-4896

MAIN FEATURES

- The bead break power is up to 1400kg.
- The automatic demounting hook device without the crowbar, which saves time and labor.
- The lifting device with lifting power 80kg can assist people to turn the tire.
- The helper arm has angle forwarding function, which is easier to separate the tire from rim.
- Suitable for low-profile and explosion –proof tire.

TECHNICAL DATA

	EE-4896
Rim material	Steel, Al., Alloy
Max. wheel diameter	1200mm
Max. wheel width	3- 14"
Rim diameter	13"-30"

TRUCK TIRE CHANGER

For 14"-26" Light Track Tires
Semi-automatic

EE-4404

MAIN FEATURES

- Power pump runs only when the tire changer is in use for more efficient operation and reduction of associated costs
- Self-centering, standard clamping capacity of 14 to 26 inches. Chuck rotation operates clockwise and counter-clockwise.
- Adjustable mount and demount head can accommodate different wheel sizes.
- Tool head includes standard disk and hook for bead loosening, mounting and demounting tires. The hook tool folds out of the way when not in use.
- Portable control system is convenient for operator to observe from different angle, improving the efficiency and safety.
- Operation voltage 24V.
- Emergency control switch.

OPTIONAL ACCESSORIES

Alu-alloy Rims Protection Set

Tubeless Roller

Alu-alloy Rims Protection RINGS

Bead breaker force	3300kg
Operation control voltage	24V
Power	220V/400V/50/60HZ/1P/3P Optional

TRUCK TIRE CHANGER

For 14"-56"
Heavy Truck Tires
Automatic

EE-4408

MAIN FEATURES

- Efficient electro-hydraulic-powered tire changer that combines a range of unique features and capabilities to make wheel service for trucks, buses, tractors and other specialized machinery faster, easier and more profitable.
- Self-centering, standard clamping capacity of 14 to 56 inches. Two-speed chuck rotation operates clockwise and counter-clockwise.
- Adjustable mount and demount head can accommodate different wheel size.
- Tool head includes standard disk and hook for bead loosening, mounting and demounting tires. The hook tool folds out of the way when not in use.
- Portable control system is convenient for operator to observe from different angle, improving the efficiency and safety.
- Operation voltage 24V.
- Emergency control switch.

OPTIONAL ACCESSORIES

Alu-alloy rims protection rings

TECHNICAL DATA

Models	EE-4408
Rim Clamping Capacity	14"-56"
Max.wheel weight	2000kg
Max. Wheel Assembly Width	1200mm
Max. Wheel Assembly Diameter	2500mm
Pump Motor	2.4/3.0kw
Gearbox Motor	2.4/3.0kw
Power	400V 3PH 50HZ

MAIN FEATURES

EE-3096v2

- Input distance rim/machine and rim diameter and width via keys.
- DYN mode for standard rim, 4 ALU modes for alloy rims or special shaped rim, statistic mode for motorcycle rim, and OPT mode for optimization.
- Pluggable position pick up board.
- Self diagnoses, easy to find the problem.
- Optional Pedal-operated main shaft lock.
- Optional motorcycle adaptor.
- CE certified by TUV.
- EMC certified.

EE-3096Av2

- Automatic input of distance rim/machine and rim diameter.
- Input width via keys.
- DYN mode for standard rim, 3 ALU modes for alloy rims or special shaped rim, statistic mode for motorcycle rim, and OPT mode for optimization.
- Pluggable position pick up board .
- SP and hidden weight mode.
- Self diagnoses, easy to find the problem.
- Optional Pedal-operated main shaft lock.
- Optional motorcycle adaptor.
- CE certified by TUV.
- EMC certified.

EE-3500

- with LED display for car and light-truck wheels.
- Automatic input of distance rim/machine and rim diameter.
- DYN mode for standard rim, 6 ALU modes for alloy rims or special shaped rim, statistic mode for motorcycle rim, and OPT mode for optimization.
- Aluminium gauge head with wheel weight clamp.
- SP and hidden weight mode.
- Pedal-operated main shaft lock.
- Self diagnoses, easy to find the problem.
- Optional motorcycle adaptor.
- CE certified by TUV.
- EMC certified.

3D WHEEL ALIGNER

EE-WA900

MAIN FEATURES

- Mini Targets
- Electronically adjustable post
- Wheeled cabinet
- 19" LCD monitor
- Minor space request, super short setup distance
- Comprehensive database coverage

TECHNICAL DATA

EE-WA900	Accuracy	Range
Total toe(front and rear)	±4'	±50°
Single toe(left and right)	±2'	±25°
Camber(front and rear)	±1'	±15°
Set back	±4'	±9°
Thrust angle	±2'	±9°
Caster	±4'	±22°
SAI(KPI)	±4'	±22°
Track width	±1mm	1.2-2.1m
Wheel base	±1mm	1.8-4.5m

OPTIONAL ACCESSORIES

Calibration kit for imaging aligner

Aluminum alloy turn table

3D WHEEL ALIGNER

EE-WA990

MAIN FEATURES

- Black diamond mini targets(BDM)
- Lift system with Self-locking mechanism
- VIN scan
- Automatic synchronized camera and target movement
- 32"LCD monitor
- Minor space request, super short setup distance
- Comprehensive database coverage
- Multi-bay compatible

OPTIONAL ACCESSORIES

Calibration kit for imaging aligner

Aluminum alloy turn table

CCD WHEEL ALIGNER

EE-WA800

MAIN FEATURES

- 3600 line CCD aligner and 8 beam infrared optical sensors.
- ZIGBEE wireless technology for 4 sensors communication.
- The sensors are effective shield against the strong light with special filter system.
- The software can automatically detect problems of sensor.
- Inclinator with temperature compensation.
- The maximum of axle distance can reach 8 meters.
- The sensor with LiFePO4 can run no-stop for 24 hours with the 2900mA battery.
- Software language: French, English, German, Russian, Spanish, Korean.
- Linux, Vista or Windows 7, Windows 8, Windows XP OS supported.

NITROGEN TIRE INFLATOR

For One Tire

EE-NI135P

For Four Tires

EE-NI160P

For Six Tires

EE-NI170P

MAIN FEATURES

EE-NI135P

- One touch Nitrogen transfer.
- Auto-inflation
- Fully automated, fully programmable, micro-processor controlled conversion system
- Nitrogen purge and fill cycle (N2P)
- Adjustable over pressure setting (OPS)
- Acousto-optic alarm
- Self-diagnostic features
- Backlight LCD display
- Suits for: Motorcycle, Car, Light Truck

EE-NI160P

- One button four tires nitrogen inflation . Converts up to 4 tires to Nitrogen simultaneously at the touch of a button, saving 30% time than single tire inflation
- Fully automated, fully programmable, micro-processor controlled conversion system Nitrogen purge and fill cycle (N2P)
- Adjustable over pressure setting (OPS)
- Acousto optic alarm
- Self-diagnostic features
- Backlight LCD display
- Auto Shut-Off -With castor -Suits for: Car, Light Truck

EE-NI170P

- 145PSI/10bar high pressure nitrogen fits for all type of tires
- One button for six tires nitrogen inflation
- Fully automated, fully programmable, micro-processor controlled conversion system
- Nitrogen purge and fill cycle (N2P)
- Adjustable over pressure setting (OPS)
- Acousto optic alarm
- Self-diagnostic features
- Backlight LCD display
- Auto Shut-Off - With castor
- Suits for: Car, Light Truck, Bus

TIRE SPREADER

Pneumatic

EE-TE52B

MAIN FEATURES

Working Type:Pneumatic

Applicable Scope:below 12.00 tire

Working Pressure:0.8-1.0MPa.

- According to the tire size, fix the hook into the proper mounting hole.
- According to the tire size, adjust the hook support height.
- The tool shelf makes tools within reach for convenient picking-up and putting-back
- The illumination can also be adjusted according to the working place.
- The water and oil separator can make lubrication function.
- With keeping certain oil level in the oil cup, water moisture in the air can not go inside the air cylinder.

EE-TE02

MAIN FEATURES

Working type:Manual

Applicable scope:Small tire

- The hook can be adjusted according to the tire width for medium-sized and small tire.
- The operating platform can be turned to any place with ideal light during tire repairing.
- Easy for inspecting and repairing tire.

Manual

Pneumatic

EE-TE60

MAIN FEATURES

Working Type:Pneumatic

Applicable Scope:For tire width below 1,200-20 large and medium-sized tire

Working Pressure:1.0-1.2MPa

- The hook can be fixed at three different levels and be adjusted to fit the tire.
- The floor type enables the operator to adjust the operating platform height accordingly.
- The auxiliary tire-loading device can help load the oversized tire with reduced manpower costs and improved efficiency.
- Easily to operating heavy tire.

SPRAY BOOTH

STRUCTURE

Cabin

Wall panel: sandwich style, polystyrene or rock wool type, two vertical sides covered by galvanized metal sheets, tongue and groove connected with each other; The density of polystyrene is 12kg/m³, and optional rock wool is 105kg/m³. 50mm,60mm,75mm and 100mm thickness are all available as required.

Front door: all the doors are without side cover design, with reinforcement inside for higher load ratings, bigger glass size for better light transmittance. Without rubber around the glass.

Emergency door: side door, works as emergency door, equipped with mechanical pressure lock and automatic return position device, when the pressure differences between outside and inside the cabin reach 100Pa, The door will open automatically.

Basement: Basement is made of galvanized steel and easy to assemble. 2 rows of grids are welded by 30×4 flat steel and 6×6 square steel. 3 rows of vein plates. 2 pcs of vein plate ramps, width 630mm, length 2000mm, good bearing, antiseptic.

Front Door

Wall Panel side with metal covered

Basement

Safety Door Lock

Intake And Exhaust

Fan: centrifugal fan, big vane, vane and motor separated. Centrifugal fan produces great air flow, easy clean, compliant to CE standard. European style professional intake fan, with M-style prefilter. The cabinet for intake fan is with profile steel frame and galvanized plates. Spraying-baking transform by pneumatic damper. Intake and exhaust ducts are separated working.

Air duct: European flange style. Exhaust ducts are standard specification. Intake ducts are for option. With 4m straight ducts and 1 piece elbow.

Damper: spraying-baking function is switched by pneumatic damper, which is controlled by control panel automatically.

Damper Operator

Centrifugal Fan

Cleaning system

pre-filter: prefilter is at inlet, filtering dust above 15um. movable maintenance door to change the filter easier.

Roof filter: multi-layers, filtering dust above 5um, mounted in the bottom of roof air chamber, good seal, fixed by support frame. Small air resistance, long use cycle. Medium air filtration, level F5, filtering 1um-5um, up to 98% filtration rate. 6 pcs of filter frames.

Filter frame: four sides of filter are fitted in the support channel, assuring good sealing. It's easily assembled by hinges and fixed by one worker only.

Filter Frame

Filter

Pre-filter

SPRAY BOOTH

Heating

Burner:Riello G20 diesel burner. Firstly the burner will generate high pressure spark via pulse, then ignite diesel.Reliable and completely burnt. Gas burner or infrared heater for optional .Diesel tank,diesel display tube,and diesel filter collocated.

Heat exchanger:made of stainless steel,large exchange area with high efficiency.

Burner

Heat Exchanger

Illumination System

Illumination system:lighting boxes are installed at both sides of booth in 45° direction. Lamp trays,tubes and power are different according to different models.700-1000lux lighting.

Illumination System

Control Panel

Control panel:high quality components,overload,overheat,phase-lacking protection.with Heat sensor device.The whole operation with stop automatically when the heating system reach the preset time and temperature. With constant temperature spraying function.

Automatic Control Box

Thermometer

Timer

Water-based paint system

Optional water-based paint system:nozzles installed on both sides in top 45 degrees direction, or at each corner. Adopt independent fan system to speed up heated air circulation,shorten curing time of oil slick.

Water Painting Compliant

Environmental Protection System

Optional environmental protection system:layers style,absorbing the toxic substance, reducing the harmful gas emissions

SPRAY BOOTH

EE-7505CE

MAIN FEATURES

- With the Germany TUV certification
- Wall panel Steel thickness is 0.426mm, make cabin very rigidity.
- The heating exchanger is made of 1.5-2.0mm SUS304 stainless steel double bile, excellent quality.
- Roof panels are made by 0.8mm galvanized steel plates
- The electronic control box components are Schneider and Siemens brand
- 2X 7.5KW direct drive turbine fan, the motor are Siemens Electronics
- Optional full grids
- Optional side exhaust
- Optional Riello RG55 diesel burner or gas burner.
- Optional water-soluble painting

TECHNICAL DATA

Models	EE-7505CE
External size(m)	7.00x5.36x3.48(LxWxH)
Internal size(m)	6.90x4.00x2.65(LxWxH)
Air return style	Full down draft,basement high 300mm
Front door structure	3 folded without frame
Safe door	1 piece in the side wall,2000*800mm
Wall panel material	50mm Rock wool panels
Steel thickness(mm)	0.6MM
Top light	2sides, 4set per side, 4pcs 16W LED lamps per set. Total: 2x4x4=32pcs 16W LED lamps
Side light	2sides, 4sets per side, 2pcs 16W LED lamps per side. Total: 2x4x2=16pcs 16W LED lamps
Electric wire connect	All connect points use amphenol connector
Intake fan(KW)	1set 7.5Kw Siemens motor turbo fan
Exhaust fan(KW)	1set 7.5Kw Siemens motor turbo fan
Total power(KW)	16KW
Generator frame	Iron frame with aluminum angle
Heat exchanger	2.0mm SUS304 stainless steel argon arc welding, double layers heat sinks
Chimney	Chimney is made by stainless steel.
Damper	Pneumatic damper
Buner	Italian Riello G20
Exhaust duct	Air inlet duct: 4M straight ducts,1pcs rain-proof hood with bird-proof mesh. Air exhaust duct: 4M straight ducts,1pcs flop damper.
Control Box	Imported components, Motor star delta start, overload, overheat, phase-lacking
filter	imported
filter installed	hingle installed, mounted above support frame
Floor	3 rows of veins plate, 2 rows of 5 twist steel ribs grids. Galvanized grilles.
Ramp	3 pcs of veins plates style ramps
Enviromental system	Fiber glass filter mesh and active carbon filter bags.
Fan capacity(M3/H)	25,000
Air velocity(m/s)	0.25-0.35
Max drying temperature	60 C -80 C
Motor Voltage	380V/50HZ/3PH(If you need other power supply, we will add some cost for each blower)

PREPARATION ROOM

EE-7660

EE-7640

EE-7650

MAIN FEATURES

EE-7660

- Down draft, air intaked from roof and exhausted through basement
- With basement, ceiling, lighting and curtain
- Filter support net and lights in the ceiling, simple paint working can be operated.

EE-7650

- Down draft, air intaked from roof and exhausted through basement
- With 2 rows of grids, ceiling, lighting and curtain
- Filter support net and lights in the ceiling, simple paint working can be operated.

EE-7640

- Without basement, with ceiling, lighting and curtain.
- semi-down draft, filtered air exhaust from rear side wall panel
- Filter support net and lights in the ceiling, simple paint working can be operated.

PREPARATION STATION

EE-7630M

MAIN FEATURES

- With universal wheel foot. Movable.
- 3 sides have filter structure, and replace filter easily.
- Economic.

FOUNDATION DRAWING

TECHNICAL DATA

Models	EE-7630M
Cabinet size(mm)	880x880x1500mm
Ventilation system	<ol style="list-style-type: none"> 1. Cabinet is made by coated steel structures with coated galvanized steel plate covers. Inner have rock wool protection materials 2. Adopt 1set YDW centrifuge 2.2kW fan. Air capacity: 8210m³/h. Fan bottom assembled 1layer active carbon filtering. 3sides air inlet with premier filters. 3. Roof assembled PVC air blower hood 4. Bottom assembled universal wheels and brake.
Control system	Turning switch style
Voltage	220V, 3Phase, 60Hz
Total power	2.2kW

GROUND MOBILE DUST EXTRACTION STATION

MAIN FEATURES

- Super strong suction force,two people work at the same time bumish
- 5 meters work arm plus 5 meters grinding dust collection tube
- covering two station,high double suction mouth
- Two 220V 15a power socket
- Three gas supply air
- Air pressure monitoring,pressure is adjustable

TECHNICAL DATA

Models	EE-DES100
Power	1.37KW/380V
Filter Area	2.8
Work Pressure:	6KG
Noise	68DB
The Number of Work	2 person

EE-DES100

DETAILS DISPLAY

Automatic star-stop work arm, shutdown can work, automatic dust removal, simple maintenance

Bring the searchlight, use more convenient security

Total power source control dust collection box fault indicator

2.5m+2.5m working arm cover two station, two people can be grinding at the same time

Hanging rack with tools,grinding tools can hang buy to temporarily not work, clean and orderly

With automatic cleaning system of the filter, the filter effect of imported plastic film is better

Square Mill

Coarse Grinding Machine

Fine Grinding Machine

In the Mill

Optimal Industrial Electric No Carbon Brush Grinding Head

Optimal Three Inchesof Grinding Head

GROUND MOBILE DUST EXTRACTION STATION

EE-DES150

MAIN FEATURES

- With the work table can be placed, grinding tools and application materials, in order to work
- Switch can be adjusted, manual, automatic switching
- Comes with the handle, moves the trolley to be more convenient human nature
- The dust collection effect is very strong, and the dust collection effect is more than 90%
- Dust collecting barrel is simple and convenient disassembly
- Grinding tools with grinding rack can hang Write work, clean and orderly
- Run, stop, failure indicator
- Multi direction rotary wheel, easy to move
- Replace the filter is simple and convenient

TECHNICAL DATA

Models	EE-DES100
Power	1.37KW/220V/60HZ
Air flow	210m3/h
Filter Area	2.8m ²
Air pressure	6kg/cm ²

PAINTING MIXING ROOM

EE-7770

STANDARD ACCESSORIES

Equipped with auto-closing door, convenient for getting in and out.

Equipped with filter for intake, supply fresh air continually to improve the air quality.

Equipped with filter for outlet, exhausting the gas in time to keep the workers safe.

MAIN FEATURES

- Painting mixing room is a modern equipment which can improve environment of painting workplace
- It has a reasonable ventilation system which can expel exhaust gas from the booth and supply fresh air inside to improve air quality

MAIN FEATURES

EE-CRT900B

- Stronger and longer service life.
- Minimum height is 140mm, vehicle could move on bench without ramp
- Top quality hydraulic system, powerful and reliable
- Fast speed clamp fixing system convenient and efficient.
- Pneumatic self-lock protective system, safety and reliable.
- Flexible moving, convenient operation, ideal for servicing light cars.

EE-CRT3500

- High precision and compact frame
- 300mm minimum height
- Top quality hydraulic system, powerful and reliable
- Strong pulling tower with 10 tons pulling force

BRAKE TESTER

4 In 1 Compact Testline EE-RBT03-4

MAIN FEATURES

Used for test the following functions of a vehicle under 3.5 tons weight:

- Vehicle Sideslip Test
 - Vehicle Sideslip Volume
 - Vehicle Sideslip Direction
- Vehicle Suspension Test (& Wheel Load)
 - Vehicle Static Wheel Load
 - Car Suspension Absorption Rate
 - Absorption Rate Difference between L/R Wheels
 - Assist to Noise detection
- Vehicle Brake Test
 - Wheel Resistance Force
 - Vehicle Max Brake Force
 - Brake Inbalance rate
 - Parking Brake Force.

- Vehicle Sideslip Tester

- Sideslip plate & Protection frame integrative structure
- Sideslip plate locker with inner key
- No maintenance body design
- Galvanized plate surface for extra long service life
- High precision sensor to ensure the exactitude of result
- Upper and lower dual bearing system makes smooth movement
- Selection of synchronic or independent motion type for different regulation requirement
- Over-value alarm function
- Standard RS-232 connection port

- Vehicle Brake Tester

- Corundum binding roller set for high adhesion in both dry and wet condition
- High precision sensor ensures the exactitude of inspection result
- Using of reinforced steel, strengthen and durable structure body
- High performance motor and gearbox
- Electronic subordinate roller (sensor roller) and speed sensor
- Automatic start and anti-peel tyre program
- Roller driven sort-out program (Air-lifter model available)
- Standard RS-232 interface connection

- Vehicle Suspension Tester

- EUSAMA measurement standard
- Wheel load function integrated
- Protection program by >200kg excited vibration
- High precision sensor ensures the exactitude of inspection result
- Galvanized plate for extra long service life
- Result display with visual graph

TOOL TROLLEY

EE-TC07

MAIN FEATURES

- Heavy duty steel structure ensures long lasting strength and durability.
- Four sides protection bars resist the impact and deformation.
- The cover board with 500KG load capacity, has the features of strong anti-embroadiered and good solvent resistance.
- Heavy duty casters made of TTE material.
- Very stable and reliable to use.
- Regular using tools can be placed orderly to improve the efficiency.

TECHNICAL DATA

Models	EE-TC07
Weight	54kg
Loading Capacity Of Drawer	45kg
Drawers	7 Drawers
Drawers Size	570x380x43mm x4, 570x380x100mmx1,
	570x380x120mmx2
Packing Size	765x510x885cm

EE-TC03

MAIN FEATURES

- Heavy-duty sivel casters (2-lockable).
- Electric static powder coating resists rust & scratches.
- Top cover & tool box keyed alike so one key opens both.

TECHNICAL DATA

Models	EE-TC03
LxWxH	920x500x420mm
G.W.	42Kg
N.W.	38Kg

PARTS WASHER & SAND BLASTER

EE-PW20G

**EE-PWAW
PNEUMATIC**

EE-SB1

MAIN FEATURES

EE-PW20G

- Rugged welded steel.
- Convenient removable work shelf.
- Parts basket for soaking small parts in solvent.
- Self-latching fuses linked fine cover.
- Electric requirement: 110V/60Hz(240V/50Hz) solvent pump.
- Max pump output through spigot: Recirculates 2.7-3.3 litre/min of solvent.
- Tank capacity: 20 Gallon.
- Solvent capacity: 12 Gallon.

EE-PWAW

- Cleaning tank capacity: 50 litre.
- Trolley tank capacity: 65 litre with level indicator.
- Compressor supply: 6-8 kg pressure.
- Pressure for output solvent: 0.4-0.5 kg.
- Flowing rate: 130kg/hour.
- Max working pressure: 125PSI..

EE-SB1

- Heavy steel construction double door on the side.
- Transparent glass viewing window.
- 40-80 PSI @ 15-25 CFM.
- Overall dimension: 138cm(H)x87cm(L)x63cm(W).
- Electrical requirements of light: 115V/230V.
- two lights.
- Maximum operation pressure:125 PSI.

OIL METER GUN

EE-OG25

EE-OG16

EE-OG15

MAIN FEATURES

- Suitable for dispensing kinds of motor oils, gear oils, automatic transmission oils, hydraulic fluids, anti-freeze liquids etc.
- Suitable for connecting 3:1 and 5:1 pump
- Four 3V battery, the battery life is 4 years
- Suitable for measuring the cubage of the liquid in the pipeline. Completed with oil outlet pipe, electronic oil meter gun oil gun etc. Equipped with rotating oil outlet pipe and anti-leaking connector. Measuring accurately. High repeated precision. simple operation. it can accumulate flow rate memory and it can preset oil flow.

WALL MOUNTED OIL DISPENSING PUMP

EE-OK675

EE-OK680

MAIN FEATURES

- Digital metering refueling gun, can display the single and cumulative amount of fuel gas, When the amount of oil to reach the required amount of oil, automatically shut down.measurement accuracy is $\pm 3\%$;
- The cart can carry 50-208KG barrel filled with Engine oil mobile refueling, convenient and quick
- Equipped with 2 Universal wheels and 2 widened double bearing fixed wheels
- The cart designed with various hooks, gun free, hanging on the hook body, make the maintenance environment clean and orderly.

EE-HR010A

EE-HR310W

EE-HR410C

MAIN FEATURES

- The central axis and other rotating parts are all made of brass, which ensure its friction resistance, good handling for stretch out and draw back
- The side plate is made of alloy steel, and is solid, durable and no deformation
- The quick coupling is made of brass, and is strong, durable, easy to connect and with long service life. And it's applicable to all kinds of standard connector
- The shell is made of high quality engineering plastic with module production, which ensure its beautiful appearance, impact can be ensured, aging resistance and long service life
- The hose material is made of advanced polyether so that ensure its good water resistance, aging resistance and long service life

AC REFRIGERANT RECOVER MACHINE

EE-AC540

EE-AC565

EE-AC530

MAIN FEATURES

- Recover and purify refrigerant into cylinder.
- Vacuumize the air conditioner
- Charge refrigerant into air conditioner from cylinder
- Charge the compressor oil into air conditioner
- Drain waste oil that is separated from refrigerant automatically
- Wheel brake and wheel cover
- Big gauge/gauge cover
- Automatic operation prompt, user no need operation training

AUTOMATIC TRANSMISSION

MAIN FEATURES

- Equal oil pressure and volume replacement
- Oil flow adjustment free
- Full automatic operation, high efficiency, reliable quality
- The unique pairs of oil passages are designed
- The amount of oil change can be 100%
- Special-purpose adapters uses in Europe, America, etc.

POWER STEERING MACHINE

EE-PSM1000

MAIN FEATURES

- Adopted the safest pneumatic pump and electric pump to adjust system by identical rate of flow pressure. It works on the equal pressure and electric current. Suction and drainage proceed at the same time. Whole the procedures are simple and safe. In order to maintain completely, we access independent cyclic cleaning system, to clean greasy filter and dirt from oil pipe thorough.
